DETAILED ACTION

1. This application is in condition for allowance except for the following formal matters:

In claim 13, lines 11-12, "adjoining the first conical face (30) toward the combustion chamber, is embodied," should read --the second conical face (32) chamber adjoining the first conical face (30), the second conical face (32) downstream of the first conical face (30),--;

in claim 13, line 15, "of which" should read --of the annular groove (35)--; and

in claim 13, line 17, "whose second groove edge (39)" should read --the second groove edge (39) of the annular groove (35)--.

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "additional annular groove (47) at least partly covering the injection ports (11) both in the closing position and in the open position of the valve member (5)" recited in claim 13 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Danckert et al.; Golv et al.; Stevens; Fath et al.; Boecking and Ricco disclose fuel injector need tips having grooves.
